BASIC-ABSTRACT:

NOVELTY - Provided is a weight for sporting goods which places a cover with different color at both sides of a case axis hole and at the circumference side of the case so that it improves external appearance of the weight.

DETAILED DESCRIPTION - The weight for the sporting goods comprises the parts of: a case(100) which combines a front sheet(110a) and a rear sheet(110b) to form a space part internally with filling the weight of waste metal pieces and adhesive included in the case; a first cover which is placed at both sides of an axis hole(120) as high as a single sill(111a); and a second cover

which is
placed at the external circumference side of the case as high as a
single
sill(111b).
